Profile

I am an active student at Universidad Fidélitas pursuing a degree in Computer Systems Engineering, with solid experience in web development focused on key areas such as SQL databases, HTML, CSS, Bootstrap, and Java. I combine my web-developer background to build interactive, unique, and functional websites. I have a strong eye for design and little details. For example, I designed a coffee-shop website and implemented the database, Bootstrap, Java, and some JavaScript to deliver a fully functional site with a shopping-cart feature. I also have experience in software documentation. My goal is to keep learning skills and gain experience to grow as a web developer.

ACADEMIC PROJECT EXPERIENCE

Universidad Fidélitas, Client/Server (15/8/2024 - 20/12/2024)

Team Lead

Led a project about a parking-lot system. Responsible of using SQL data bases, CRUD and a MVC design pattern, as well as designing a user interface. Responsible of creating a billing system, that generates invoices with entry/exit times and corresponding fees at the moment of exit. Responsible of all the programming and correct execution. Achievements:

- Successfully created a program that simulates a parking lot.
- Achieved the correct utilization of the SQL database, MVC design pattern and CRUD.
- Achieved an error free program.

Universidad Fidélitas, Web Application Development (17/1/2025 - 20/4/2025)

Team Lead

Led a project about a coffee shop web page with Bootstrap, complete management of the project planning, SQL data base, implementation of the prototype to the web page and backend. Planning and implementation of the users stories to the program. Achievements:

- Create a web page with a functioning shopping-cart.
- Create a catalog of the products, with the possibility of filters and extended queries.
- Different types of views depending on if the user has, admin, seller or client privileges.
- Creation of users using email activation.
